EXPERIENCE

METAINFOSCI | NLP AND FULL STACK PROJECT INTERN

June 2025 – Present | Gurugram, India

- Designed and deployed NLP pipelines to extract thematic patterns from Scopus, WOS and other data sources using transformer models and topic modeling techniques.
- Built a full-stack research analytics tool using Django, PostgreSQL, and React with real-time inference visualization.

USTART | WEB DEVELOPMENT INTERN

November 2024 – May 2025 | Gurugram, India

- Engineered scalable backend APIs using Node.js and integrated PostgreSQL and Firebase for structured and unstructured data.
- Built dynamic frontend components with Next.js and TypeScript, improving UX across admin and client portals.
- Developed core algorithms for location-based driver matching and dynamic pricing using geospatial and rule-based logic.

PROJECTS

SPENDLY | NEXT.JS, TYPESCRIPT, PYTHON, SOLIDITY, IPFS, MICROSERVICES ARCHITECTURE

2025 | 🌐

- Built a decentralized personal finance platform supporting stock market, mutual funds, and crypto, with smart contracts for automated crypto trading and threshold-based buy/sell strategies.
- Developed AI-driven budgeting and investment recommendation engines for personal finance optimization using real-time market data and agentic decision workflows.

SOPHIANET | NEXT.JS, PYTHON, CLIP, BLIP, STABLE DIFFUSION, AWS BEDROCK, LANGCHAIN, RAG

2025 | 🌐

- Built a DIP-first multimodal platform for digitizing handwritten notes and diagrams using core image processing techniques.
- Implemented OCR and CLIP-based multimodal embeddings to unify text and images, enabling cross-modal retrieval and RAG-grounded reasoning.
- Designed an autonomous query router with tool- and agent-based orchestration, integrating LLMs, text-to-image, image-to-text pipelines, and internet-connected tools including web search and YouTube crawlers.

COLLABDRAW | NEXT.JS, WEBSOCKET, REDIS(PUB-SUBS), TURBOREPO, PRISMA, POSTGRESQL

2025 | 🌐

- Built a synchronized whiteboard and chat tool using WebSockets and Next.js, enabling real-time collaboration across clients, with a scalable pub-sub based architecture.
- Developed an acknowledgement queue system to preload previous drawings and messages for new participants.

ACHIEVEMENTS

- Secured 2nd position in Smart India Hackathon (SIH) 2025 Internals.
- 1st position at Techsprint 48-hour Hackathon 2025 held at Graphic Era, Dehradun.
- 2nd runner-up at the national-level hackathon Code Kshetra 2.0 by Geek Room.
- Secured 1st position at ACIC Innoverse'36 Hackathon 2025 held at SGTU.
- 2nd place, Creative Robot Designing – Innovation Festival, NSC Delhi (Jan 2018).

SKILLS

PROGRAMMING:

C++ • Python • TypeScript • Rust • JavaScript • Solidity • SQL • Java • PHP • R

LIBRARIES/FRAMEWORKS:

Next.js • Node.js • React.js • Flask • Django • FastAPI

TOOLS/PLATFORMS:

Git/GitHub • AWS • Vercel • Azure • Docker • Kubernetes • PostgreSQL • MongoDB • Firebase • IPFS • Supabase • Redis • Kafka

EDUCATION

BML MUNJAL UNIVERSITY

BACHELOR OF TECHNOLOGY IN
COMPUTER SCIENCE AND
ENGINEERING

Aug 2023 - Present | Gurugram, Haryana
School of Engineering and
Technology

Cum. GPA: 9.27 / 10.0

ROTARY PUBLIC SCHOOL

2022 | Gurugram, Haryana
10th CBSE Boards

Percentage: 89.2 / 100

12th CBSE Boards

Percentage: 82.5 / 100

LEADERSHIP

- Student-Alumni Relationship Cell Web Development Lead
- Fest Website Team Lead
